

ANNUAL FINANCIAL REPORT 2024

Executive Summary

This annual report presents the financial performance of TechCorp India for fiscal year 2024. The company achieved total revenue of 2.4 Crore rupees, representing a 24% growth compared to the previous year.

Key Highlights

Revenue grew steadily from January through August 2024, reaching a peak of 28 Lakhs in August. However, September showed a sharp decline of 35% due to reduced marketing spend as the company shifted focus toward research and development investments.

Product Performance

Electronics category, particularly Product C, contributed 58% of total revenue, making it the strongest performing product line. The company's strategic decision to invest in R&D during Q3 is expected to yield new product launches in Q1 2025.

Regional Analysis

Region 3 showed underperformance compared to other regions throughout the year. Management has identified this as a key area for improvement and plans to allocate additional marketing resources in the upcoming fiscal year.

Future Outlook

The management team remains optimistic about Q4 performance and expects revenue recovery following the September dip. New product launches planned for early 2025 are anticipated to drive significant growth.

Risk Factors

The company faces risks related to supply chain disruptions, increasing competition in the electronics sector, and potential economic slowdown affecting consumer spending patterns.
